

OVERVIEW

Holistic Training Methodology

- Terminals across the world look for systems that offer integrated training platform with Process, Documents, Training and Assessments to meet the increasingly complex business training needs.

All-in-one Solution

- An advanced training platform that brings together the various processes, documents, and associated artefacts in a controlled and interactive platform for terminal staff.

Training anyone, any device

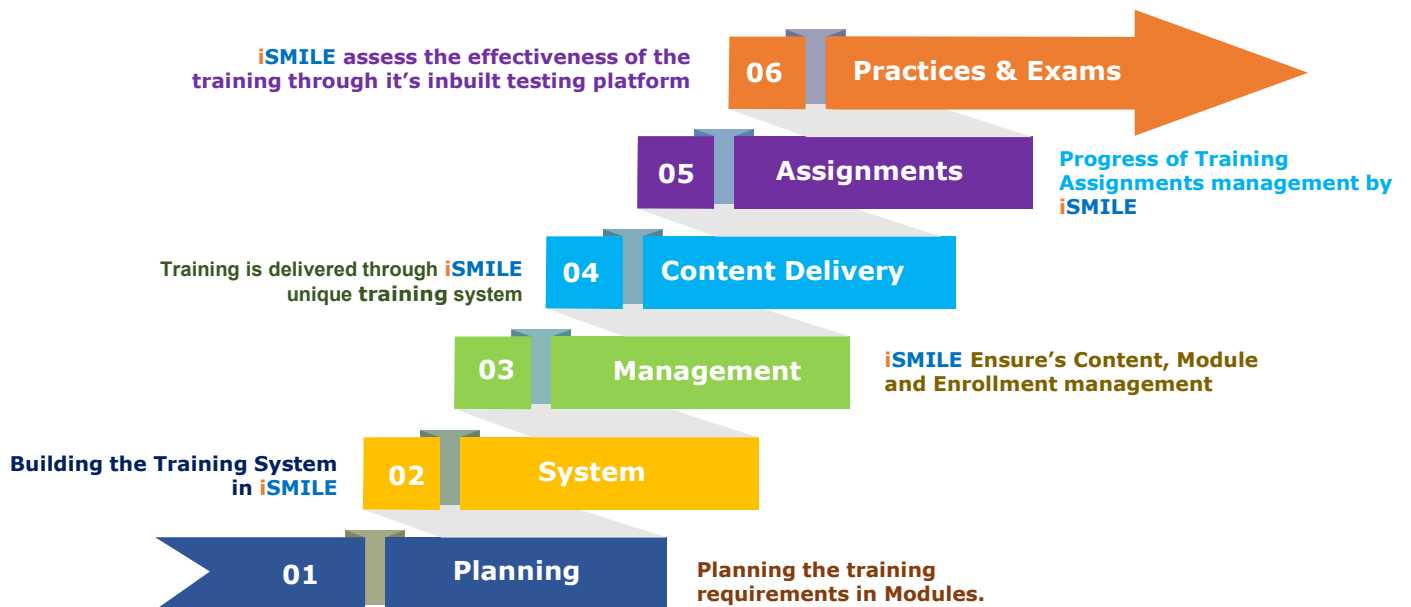

- Allows the terminal's training department to train and validate the employee skills on crucial business process and application knowledge.

OUR APPROACH

With its purpose-build workflow, iSMILE unlocks the full potential of the terminals documented Business Processes, by integrating these processes with KEY assets like Standard Operating Procedures (SOP)'s and the Training management system.

TRAINING DELIVERY PROCESS

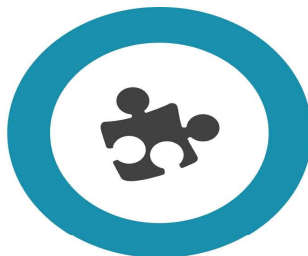

THE BENEFITS

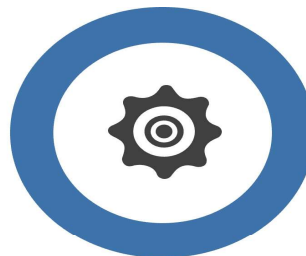

Process driven

Allows the BPM maps to be the driver for key organizational artefacts like: SOP's, Compliance management, Requirement management and Test scripts, Training, Document handling, etc.

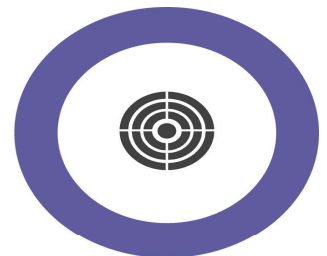

Long-sighted

Provides an integrated view of the terminal to the operations team and takes learning to people instead of people to the traditional learning tools.

Up-skilling

Helps consistent training of existing resources to validate/improve their knowledge through digital interactive training and assessments.

Resourcing

Ramp-up new hires faster with easily accessible and meaningfully interlinked training material.
